

INSPECTA SERIES HD INSPECTION CAMERA

REDEFINING PIPELINE VISIBILITY

The Inspecta HX Pipe Inspection Camera is a high-performance industrial inspection system engineered for evaluating complex pipelines and heat exchanger systems. Equipped with a high-resolution camera, it delivers real-time, crystal-clear imaging to accurately identify defects such as corrosion, scaling, cracks, and blockages.

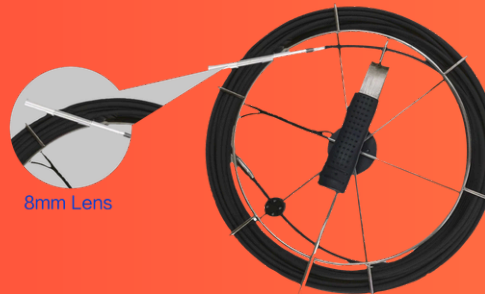

The unit features a robust vertical reel system with a 20-meter rigid push-rod cable, enabling smooth deployment through long-distance and slightly curved pipelines, as well as heat exchanger tubes. An integrated precision metering device ensures accurate cable length tracking for efficient inspection reporting.

FEATURES

- 7-inch touchscreen, dual-mode operation.
- LED lighting, infinitely adjustable, switchable between dual color temperatures and high/low beams.
- Multiple lens options available.
- Professional cable management system, ensuring efficient cable organization and user-friendly operation
- Built-in 6600 mAh high-capacity Li- battery.

8MM CAMERA

Camera Dia : 8mm
Lens Length : 3cm
Resolution : 1 MP
IP Level : IP68
FOV : 145°
Light : 6 LED light
DOF : 10-50mm/30-80mm
Stainless Steel Material
