

This electric high-pressure jet machine is engineered for professional commercial wash applications, delivering a maximum pressure of 500Bar for efficient cold-water cleaning. Constructed with durable metal components and a robust coil system, it ensures long-lasting performance.

The unit features a thermally protected motor and a gear-driven pump crankshaft for reliable medium-duty operation. CE certification confirms compliance with EU safety standards and supports market acceptance.

Technical Data

Power	4kW
Pressure	200 Bar
Flow	15L/min
Voltage	220V
Motor Speed	1450R/min
Transfer Method	Crankshaft drive
Movement Material	Pure Copper
Pump Material	Brass
Water Source	Faucet/Self Priming
Motor Cooling	Air Cooling
Motor Type	Induction Motor
Leakage Protection	Yes
Outlet Pipe Material	Double Layer Steel Pipe
Outlet Pipe Length	50M
Size	70 x 53 x 50 cm
Weight	66kg
Pump Type	Crankshaft Pump

Standard Accessories

High Pressure Water Gun
Steel Pipe Hose
Manometer
Foam pot
Gun Head Ext Rod
Quick Connect Nozzle
Inlet Pip
Filter
