

The SI1180 Green Laser Distance Meter is a high-performance measuring tool designed for precise distance measurement up to 150 meters. Equipped with a powerful green laser, this distance meter offers enhanced visibility even in bright conditions, making it ideal for both indoor and outdoor applications.

Featuring a large color TFT display, multiple measurement modes and dustproof construction, the SI1180 ensures accurate and reliable measurements in various environments. This device is perfect for professionals in construction, surveying, and real estate who require dependable and easy-to-use measurement tools.

FEATURES

- High Precision Measurement
- Enhanced Visibility
- Multiple Measurement Modes
- Compact and Portable
- Electronic angle sensor

TECHNICAL SPECIFICATION

Measuring range	0.05m~150m
Display	Color screen LCD
Laser Type	505~670nm,<1mW
Camera Auxiliary Alignment	Yes
Data Storage	30 groups
Protection	IP40
Units	m/ft/in
Laser	Green
Operating environment	0~40°C
Battery	9V battery
Dimension	134 x 56 x 27 mm
Weight	130 g
Warranty	12 months
